CONTENTS

JANUARY, 1934

Mosaic Crystals of Zinc . . . . . HAROLD K. SCHILLING 1
Diffusion Through a Membrane . . . . . COLIN BARNES 4
Thermoelectric Metal-Crystal Analyzer . . . . . M. F. HASLER 9
Shot Effect and Electrical Breakdown in Insulators . . F. E. HAWORTH AND R. M. BOZORTH 15
Unsteady Flow of Fluids in Oil Reservoirs . . . . . WILLIAM HURST 20
Magneto-Optic Method of Determining the Vitamin Content of Various Substances . . . . . G. M. WISSINK 31
Mutual Impedance of Grounded Wires Lying on the Surface of the Earth When the Conductivity Varies Exponentially with Depth . . . . . MARION C. GRAY 35

FEBRUARY, 1934, RHEOLOGY NUMBER

Viscosities of Liquids and Their Vapor Pressures . . . . . E. W. MADGE 39
Further Studies on the Relation Between Constitution and Association: Especially in Reference to Aromatic Compounds . . . . . EUGENE C. BINGHAM AND JOHN A. GEDDES 42
Stress-Strain Relation in Textile Fibers . . . . . R. L. STEINBERGER 53

MARCH, 1934

On the Theory of an *N*-Winding Transformer . . . . . LAWRENCE E. BROWN 61
Methods for Calculating the Volumetric Composition of Fluid Mixtures . . S. H. INGBERG 64
Flow of Compressible Fluids Through Porous Media and Some Problems in Heat Conduction . . . . . MORRIS MUSKAT 71
Sorption on Cotton Fibers of Dyes with Varying Molecular Association in Solution . . . . . GEORGE L. CLARK AND JULIA SOUTHARD 95

APRIL, 1934

Absorption of Heat Rays by Fog . . . . . E. O. HULBURT 101
Dielectric Recovery of a.c. Arcs in Turbulent Gases . . . . . T. E. BROWNE, JR. 103
On the Theoretical Determination of Earth Resistance from Surface Potential Measurements . . . . . A. F. STEVENSON 114

MAY, 1934, RHEOLOGY NUMBER

What is Oiliness? . . . . . OSCAR C. BRIDGEMAN 125
Creep of Wires at High Temperature . . . . . W. O. RICHMOND 131
Concerning the Effect of Strain and Rate of Strain on Tensile Tests at Normal and Elevated Temperatures . . . . . R. BEEUWKES 135
Concerning the Distribution of Stress in a Laterally Compressed Strip . C. W. MACGREGOR 140

JUNE, 1934

X-Ray Crystal Measurements of Nickel at High Temperatures . . . WILLIAM P. JESSE 147
Charges on Droplets Produced by the Spraying of Liquids as Revealed by the Millikan Oil Drop Method . . . . . SEVILLE CHAPMAN 150
Investigations on Turbulent Flow by Means of the Hot-Wire Anemometer . . . . . F. L. WATTENDORF AND A. M. KUETHE 153
Propagation of Elastic Waves in Ice. Part I . . . . . MAURICE EWING, A. P. CRARY AND A. M. THORNE, JR. 165

JULY, 1934

Permeability Changes in Ferromagnetic Materials Heat Treated in Magnetic Fields . . . . . G. A. KELSALL 169
Space Charge Grid Tube with Variable Mu Grid . . . . . WALTER DEHLINGER . 173
New Type Long Period Vertical Seismograph . . . . . LUCIEN J. B. LACOSTE, JR. 178
Propagation of Elastic Waves in Ice. Part II . . . . MAURICE EWING AND A. P. CRARY 181
Investigation of an Alternating-Current Method of Determining Critical Potentials . . . . . ROGER W. HICKMAN 185

AUGUST, 1934, RHEOLOGY NUMBER

Viscosity of Undercooled Liquid Glucose . . . . . GEORGE S. PARKS, LOIS E. BARTON, MONROE E. SPAGHT AND J. WILFRED RICHARDSON 193
Viscosity Anomalies . . . . . M. PICHOT 200
Some Rheologic Aspects of Petroleum Production . . . . . A. G. LOOMIS, H. A. AMBROSE AND H. T. KENNEDY 207
Alternating Stress Method for the Measurement of the Consistency of Very Stiff Materials . . . . . EUGENE C. BINGHAM AND ROBERT A. STEPHENS 217
Rheological Properties of Asphalts. I. Effect of Temperature . . . . . C. U. PITTMAN AND R. N. TRAXLER 221

SEPTEMBER, 1934

Nonmetallic Conducting Films . . . . . S. BLOOMENTHAL 225
Fluctuation Noise in Vacuum Tubes . . . . . G. L. PEARSON 233
Behavior of a Copper Oxide Photoelectrolytic Cell When Used with Sinusoidally Varying Illumination . . . . . WILBUR E. MESERVE 244
Two Fluid Systems in Porous Media. The Encroachment of Water into an Oil Sand . . . . . MORRIS MUSKAT 250
Experimental Study of the Motion of Particles in Systems of Complex Potential Distribution . . . . . R. D. WYCKOFF AND H. G. BOTSET 265
Radium Content of Some Connate Waters . . . . . HOLBROOK G. BOTSET 276

OCTOBER, 1934

Some New Sedimentation Formulas . . . . . HAKON WADELL 281
Thermal Agitation Voltages in Resistors . . . . . C. NEITZERT 292
Effect of Nascent Hydrogen on the Magnetic Properties of Iron . . . . . R. K. REBER 297
Piezoelectric Properties of Quartz and Tourmaline . GERALD W. FOX AND GEORGE A. FINK 302
Inverse Boundary Value Problem in Seismology . . . . . CHAIM L. PEKERIS 307
Study of Emergence Angle and Propagation Paths of Seismic Waves . . . . . MAURICE EWING AND A. P. CRARY 317

NOVEMBER, 1934, RHEOLOGY NUMBER

Theory of Non-Newtonian Liquids . . . . . MARKUS REINER 321
Viscometric Studies of Rubber Solutions . . . . . MARKUS REINER 342
Conicylindrical Viscometer . . . . . M. MOONEY AND R. H. EWART 350
Flow Characteristics of Sewage Sludge and Other Thick Materials . . . WILHELM MERKEL 355

DECEMBER, 1934

Electrical Conductivity of Glass. Part I. The Formation of Highly Resistant Layers . . . . . H. R. KIEHL 363
Electrical Conductivity of Glass. Part II. Current Increase Phenomena with Highly Resistant Layers . . . . . H. R. KIEHL 370
Mechanism of Division of Small Liquid Systems Which Are the Seats of Physico-Chemical Reactions . . . . . N. RASHEVSKY 374
Stabilizing Arcs by Electrode Surfacing . . . . . C. G. SUITS 380
Glass-to-Metal Seals . . . . . ALBERT W. HULL AND E. E. BURGER 384
Analysis of Thermal Stresses in Sealed Cylinders and the Effect of Viscous Flow During Anneal . . . . . HILLEL PORITSKY 406
Fatigue and Crystal Recovery in Aluminum . . . . . HOWARD A. SMITH 412
Author Index to Volume 5 415
Analytic Subject Index to Volume 5 417

Notice to Contributors

Manuscripts

Send manuscripts to John T. Tate, University of Minnesota, Minneapolis, Minnesota.

Papers must be in English, typewritten double spaced with wide margins.

Abstracts

An abstract must accompany each article. It should be adequate as an *index* and as a *summary*. As an index it should give all subjects, major and minor, concerning which new information is presented. As a summary it should give the conclusions of the article and all numerical results of general interest.

References

References should appear as foot notes, numbered consecutively, and arranged thus:

A. B. Smith, Phys. Rev. **41**, 852 (1932).

Captions and Legends

Legends for figures must accompany manuscript. Each table should have a caption. These in all cases should be complete in themselves so as to make the data intelligible to the reader without reference to the text.

Mathematical Expressions

Make all expressions clear to the typesetter. Identify in the margin of the manuscript Greek letters and unusual symbols.

Use fractional exponents instead of root signs.

Avoid complicated exponents and subscripts. Should it be necessary to repeat a complicated expression a number of times it should be represented by some convenient symbol.

The solidus (/) should be used wherever possible for fractions.

Illustrations

Plan figures for approximately one-half reduction. Wherever possible arrange figures so that after reduction they will not be wider than three inches. Lettering must be large enough to be readable after reduction.

Line drawings must be made with India ink on white paper or tracing cloth. Coordinate paper is not desirable, but if used must be blue-lined and all coordinates to be reproduced drawn with India ink.

Drawings which cannot be used will be returned to the author or redrawn at his expense.

Photographs should show clear black and white contrasts.

Avoid round and oval photographs.

Publication Charge

A portion of the cost of publishing the results of research must be regarded as an integral part of the cost of the research. In keeping with the policy which is effective for the Institute's publications a bill for $3.00 per page will be sent to the authors of papers appearing in this journal. It is intended that the authors shall present these bills for payment to the institutions which have supported their researches. If the institution is unable to make payment the bills are to be returned marked "No Funds Available."

Reprints

As a partial return for the publication charge one hundred reprints without covers will be furnished free. Additional reprints may be obtained at a regular schedule of prices.

Alterations

Take great care that each manuscript is typographically accurate. A limited number of alterations in proof are unavoidable, but the cost of making extensive alterations after the article has been set in type will be charged to the author.

Proof and all correspondence concerning papers in the process of publication should be addressed to the Editorial Secretary, American Institute of Physics, 11 East 38th Street, New York, N. Y.

THE AMERICAN PHYSICAL SOCIETY

ARTHUR H. COMPTON, *President*
University of Chicago
Chicago, Illinois

R. W. WOOD, *Vice-President*
The Johns Hopkins University
Baltimore, Maryland

W. L. SEVERINGHAUS, *Secretary*
Columbia University
New York, New York

G. B. PEGRAM, *Treasurer*
Columbia University
New York, New York

JOHN T. TATE, *Editor*
University of Minnesota
Minneapolis, Minnesota

L. B. LOEB, *Local Secretary for the Pacific Coast*
University of California
Berkeley, California

THE object of the American Physical Society is the advancement and diffusion of the knowledge of physics. It sponsors *The Physical Review*, *Physics* and the *Reviews of Modern Physics*. Upon the recommendation of two or more members, any person engaged in work in the field of physics or actively interested in physics may become a member; receive one of the journals; receive also *Science Abstracts* A, *The Review of Scientific Instruments with Physics News and Views*, and the Bulletin of all meetings; and attend and participate in the seven annual meetings.

Annual dues: $10. Fellows, $14.

For further information address the Secretary as above.

THE SOCIETY OF RHEOLOGY

S. E. SHEPPARD, *President*
Eastman Kodak Company
Rochester, New York

EUGENE C. BINGHAM, *Editor*
Lafayette College
Easton, Pennsylvania

A. STUART HUNTER, *Secretary & Treasurer*
Du Pont Rayon Company
Buffalo, New York

THE Society of Rheology was formed in 1929 to advance the science of the deformation and flow of matter. It cooperates with the American Physical Society in editing *Physics* of which four issues per year are devoted to *Rheology*. All persons interested are invited to become members and participate in the proceedings at the annual December meetings. Members receive without other charge than their dues all issues of *Physics*, *The Review of Scientific Instruments with Physics News and Views* and the notices of the Society.

Annual dues: $6.

For further information address the Secretary as above.
